BIOGRAPHY

From a small town in Germany to the underground stages of Istanbul — Findike's journey is one of pure persistence, originality, and music made from the soul.

Findike is the artist name of Emrah Findik, born on April 16, 1977 in Langen, Hessen, Germany. He returned to Istanbul at an early age, where he grew up and built his life — carrying his German roots while becoming one of Istanbul's most dedicated underground music producers.

After completing the Fenerbahce Football Academy, he entered the hospitality industry. In 1995, he began his first internship at the prestigious Holiday Inn Crowne Plaza in Atakoy Marina, Istanbul — working at the Kupeste Bar, where music filled every night and quietly planted a seed that would grow for decades.

In 2006, Findike opened FL Studio for the first time. He installed it, deleted it, reinstalled it — five times. He did not give up. That stubbornness, that refusal to quit, became the foundation of everything that followed. Later transitioning to Ableton, he developed a unique production identity: fast, intuitive, deeply emotional. Serial production and rapid improvisation became his signature.

In 2014, he released his first official single 'A Land of Darkness' on Beatport. In 2016, his debut album was released through Boiler Room — one of the most prestigious underground music platforms in the world. By 2017, he had founded Findike Records, with sub-labels Deep Poison Records and Dark Hooks Records following in 2021. The label network is internationally managed from France by his close friend and family confidant Serge Sommaire.

The connection with Serge is itself a testament to what music can do. Born in Tahiti and based in France, Serge followed Findike on Facebook for 2-3 years, drawn purely by the music. One day he announced he was flying to Istanbul. Findike didn't believe it — until he looked up from the decks mid-set and saw him standing there. That night, a lifelong friendship was born.

In 2024, 'Passenger' entered TikTok's Official Sound Library in both Original Mix and Radio Edit formats. Within 4-5 months, over 14,000 organic videos were created — entirely without paid promotion. Shortly after, 'Attention' followed with 7,000+ videos and a single user video reaching 2 million views, primarily across European Union countries.

In March 2026, Findike released his latest album '**After Us Nothing**' (FER0131) — his most ambitious work to date, on Findike Records.
